PROFESSIONAL SUMMARY

Senior Full-Stack Web Developer & Automation Engineer with AI engineering expertise. Proven track record architecting multi-company enterprise web platforms, scalable internal SaaS systems, and responsive interfaces with Next.js, React, Node.js, Laravel, FastAPI, and PostgreSQL. Experienced in integrating embedded AI assistants, Onorca workflows, and LLMs into practical product logic, alongside automated data pipelines and containerized deployments.

EDUCATION

University of Mindanao Digos College

Bachelor of Science in Information Technology

TECHNICAL SKILLS

Languages:	TypeScript, JavaScript, Python, SQL, HTML/CSS
Frontend:	React, Next.js, Vue 3, Tailwind CSS, Inertia.js
Backend & APIs:	Laravel, Node.js, FastAPI, Hono, REST APIs, WebSockets, Webhooks
Databases & ORM:	PostgreSQL, MySQL, SQLite, Supabase, Prisma, Redis, SQLAlchemy
Automation & Tools:	Onorca, Web scraping, Puppeteer, Browsershot, workflow automation, Polars
AI Engineering:	Embedded AI assistants, Gemini API, LLM integration, AI agents, prompt engineering
DevOps & Cloud:	Docker, Azure, Git, GitHub Actions, Nginx, Cloudflare R2, DigitalOcean

FEATURED PROJECTS

Gemstone Construction Construction Operations & Financial Workspace (Sole Developer)

Next.js 16, React 19, TypeScript, PostgreSQL, Supabase, Anthropic Claude AI, Leaflet, RingCentral SMS, PWA

- Personally architected full-stack construction workspace & PWA covering project budgets, AI PDF bid intake/leveling, AP invoices, and bank draws.
- Built interactive multi-crew scheduler with contractor RSVP portals, automated reminder crons, and RingCentral SMS notifications.

OWSI Giveaways Verified Campaign & Live Raffle Engine (Sole Developer)

Next.js 16, React 19, TypeScript, Supabase, PostgreSQL, Tailwind CSS 4, Anthropic AI, Meta Graph API, Resend

- Engineered custom Gleam replacement featuring hybrid Meta API comment verification, screenshot review queues, and passwordless OTP portals.
- Implemented synchronized live raffle wheel draw rooms with weighted/equal odds, practice spins, and immutable draw audit trails.

OWSI Notebook Collaborative Interior Design Canvas & Client OS (Core Contributor)

Next.js 16, React 19, TypeScript, Tailwind CSS 4, Zustand, TanStack Query, Supabase, PostgreSQL, Yjs, AWS S3

- Co-developed OneNote-inspired design workspace supporting free-form canvases, rich tables, ink drawing, OneNote imports, and AI visual tools.
- Built Standard/Full House design boards, slab worksheets, and scoped client-sharing portals with real-time SSE and Yjs collaboration.

RELEVANT EXPERIENCE

Senior Developer (Founding Developer) 2026 Present

OWSI (Old World Stone Imports USA) & Gemstone Development LLC

- Founding core developer across dual Utah enterprises owned by Skyler Berry, directing platform architecture across both parent and sister ventures.
- Delivered 3 web platforms with automated features, reducing company operational workload by 60% via embedded AI & internal tooling.
- Embedded intelligent AI assistants and accelerated workflows (Onorca, LLMs) directly into platform logic for high-speed team operations.

Full-Stack Web & Automation Developer 2026

Infosoft (Mini Clean Business Solutions)

- Developed full-stack web applications involving database workflows, backend REST APIs, frontend dashboards, and automated pipelines.
- Engineered SQL migration tooling, browser automation, data extraction, validation flows, and cloud storage deployments.

AI Application Developer / Automation Builder 2024 2026

Freelancer

- Built AI-powered application concepts, automation workflows, crawling/auditing systems, and backend-driven data tools.
- Designed workflows where AI supports automation, prediction, analysis, validation, and decision support with clean system ownership.
