PROFESSIONAL SUMMARY

AI Application Developer / AI Engineer focused on building AI-powered automation systems, data migration platforms, crawling and auditing tools, predictive workflows, and data-driven applications. Experienced in full-stack development, backend systems, AI-assisted workflows, database processing, and practical product implementation.

EDUCATION

University of Mindanao Digos College

Bachelor of Science in Information Technology

TECHNICAL SKILLS

Languages:	TypeScript, JavaScript, Python, SQL, HTML/CSS
Frontend:	React, Next.js, Vue 3, Tailwind CSS, Inertia.js
Backend & APIs:	Laravel, FastAPI, Node.js, Hono, REST APIs, WebSockets, Webhooks
AI & Automation:	AI agents, LLM integration, web scraping, Puppeteer, Browsershot
Databases:	PostgreSQL, MySQL, SQLite, Supabase, SQLAlchemy, SQLGlot, Polars, pandas, Redis
Testing & Debugging:	Postman, anomaly review, structured verification
Cloud:	Azure, Docker, Nginx, Git, GitHub Actions, Cloudflare, DigitalOcean

FEATURED PROJECTS

Atelier Philippine Creative Directory & Professional Service OS

Next.js 15, React 19, TypeScript, Prisma 7, PostgreSQL, Tailwind CSS, Cloudflare R2, PDF-Lib, Docker, Traefik

- " Modular monolith uniting talent discovery, canonical nickname profiles ([nickname]), booking workflows, and PDF invoicing.
- " Engineered booking lifecycle with deposit tracking, tokenized handoffs, private Cloudflare R2 vaults, and Docker/Traefik deployment.

SQAuto Industrial SQL Dump Data Migration Platform

Next.js, FastAPI, PostgreSQL, Polars, Redis, Gemini, SQLGlot

- " Built safe migration pipeline for restoring, profiling, cleaning, repairing, validating, and exporting legacy SQL dump data.
- " Uses read-only source principle, sandbox staging, deterministic validation, AI anomaly detection, and multi-DB exports.

CipherLens AI-Powered Defensive Security Auditing Platform

React, TypeScript, NestJS, Python, FastAPI, PostgreSQL, Supabase, Redis, BullMQ, Docker

- " Enterprise-grade defensive security platform for automated auditing of websites and git repositories (SSL/TLS, secrets, CVEs).
- " Integrates Gemini AI to generate structured findings, risk prioritization scoring, and actionable remediation guidance.

RELEVANT EXPERIENCE

AI Application Developer / Automation Builder

2024 2026

Freelancer

- " Built AI-powered application concepts, automation workflows, crawling/auditing systems, and backend-driven data tools.
- " Designed workflows where AI supports automation, prediction, analysis, validation, or decision support.
- " Used AI-assisted development tools while maintaining responsibility for system design, debugging, code quality, and product functionality.

Full-Stack Automation & System Developer

2024 2026

Infosoft (Mini Clean Business Solutions)

- " Developed full-stack systems involving database workflows, backend APIs, frontend dashboards, and automated processing pipelines.
- " Worked with SQL migration, browser automation, data extraction, validation, cloud storage, and deployment workflows.
- " Used documentation-first planning and modular architecture to support safer implementation and maintainability.
